PROFESSIONAL SUMMARY

Marketing Motion Designer with an academic background in Computer Science & Artificial Intelligence, specializing in high-converting video ads for mobile subscription apps. Combines high-velocity generative AI pipelines (Seedance 2.5, Higgsfield, Nano Banana, ElevenLabs) with precise post-production in After Effects (motion graphics, kinetic typography, multi-layer compositing, sound design). Focused on scalable creative iteration on Meta, establishing prompt standards, and driving high visual fidelity without generic AI aesthetics.

WORK EXPERIENCE

SKELAR (Leaply) **Remote, Ukraine**
Marketing Motion Designer May 2026 – Present

- Produce high-impact performance video ads and static creatives end-to-end for a digital health & wellness mobile app, focused primarily on Meta (Feed, Reels, Stories).
- Architect and deploy hybrid generative AI pipelines using Seedance 2.5, Higgsfield, and Nano Banana for character b-roll, narrative hooks, and photorealistic scene generation; voice with ElevenLabs.
- Execute full post-production in After Effects: 2D animation, kinetic typography, multi-layer compositing, visual pacing, and sound design to maximize 3-second hook retention.
- Develop prompt guidelines and workflow documentation to standardize generative outputs across tools, maintain character and style consistency, and eliminate rework.
- Rapidly test and scale variations on winning creative concepts, iterating on hooks, pacing, and CTAs, and localized deliverables across 10+ international languages.
- Shipped 100+ creative assets spanning AI-generated narrative prequels, live-action compositing, UGC-style dynamic hooks, and high-CTR statics.

devabit **Lviv, Ukraine**
DTP Engineer, Multimedia Dec 2024 – May 2026

- Managed multimedia localization, video engineering, and quality assurance within a high-volume global enterprise production pipeline, ensuring visual consistency and typographical precision.
- Executed on-screen text (OST) replacement and animated subtitle styling in After Effects and Premiere Pro across multi-language international deliverables.
- Implemented AI-assisted workflows for automated speech transcription, subtitle timing, and generative cleanup/inpainting of source footage.
- Prepared and reconstructed complex multilingual layouts in InDesign and CAT tools, fixing typography, line breaking, and alignment errors.

Placard **Lviv, Ukraine**
Technical Graphic Designer Dec 2023 – Dec 2024

- Managed prepress preparation and technical layout design for commercial outdoor banners, vehicle wraps, commercial displays, and branded print collateral.
- Prepared high-precision vector layouts, color separations (CMYK/Pantone), and bleed offsets for large-format commercial printing.
- Calibrated cutting paths and operated CNC vinyl plotters for decal and sticker manufacturing.

CORE COMPETENCIES & TECHNICAL SKILLS

Motion & Video: After Effects, Premiere Pro, Figma, Photoshop, Illustrator, 2D Motion Graphics, Kinetic Typography, Compositing, Color Grading, Sound Design
Generative AI: Seedance (2.5), Higgsfield, Nano Banana, ElevenLabs, Prompt Guidelines & Systematization, Character Consistency, Inpainting
Performance Marketing: Creative Strategy, 3-Second Hook Rate Optimization, Meta Ads (Feed / Reels / Stories), UGC Iterations, Multi-Language Localization (10+ Languages)
Technical & Production: Multimedia Localization, Subtitling, Prepress/DTP, Color Management (CMYK/Pantone), Plotter Operations, FFmpeg, Bun / TypeScript Automation
Languages: Ukrainian (Native), English (B2 / Professional Working Proficiency)

EDUCATION

Lviv Polytechnic National University **Lviv, Ukraine**
BSc in Computer Science, Specialization in Artificial Intelligence (AI) 2020 – 2024
